(Further suggestion Eduardo - that hand that appears in your order box, no offense but it's a rather ugly hand, can you find a better one to use? The one you've got at the moment looks like a chickens foot! Pretend you've got a credit card held by the edges of the card, front of the credit card facing away from you and now thrust your hand towards an imaginary camera lens in front of you - that look a darn sight better, drawing more attention to your offer instead of attention being placed on that hand popping in from the right hand side.)
